Coastlines On The Air

Uploading an activation log

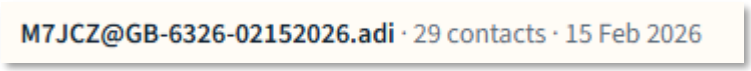

1. Sign in at ukcota.com.
2. Open **My Station** and save your callsign, name and locator if you have not already done so. A log cannot be uploaded until the callsign is saved.
3. In your logging program, export the activation as an ADIF file. The file name must end in .adi or .adif.
4. Click the **Logs** tab.

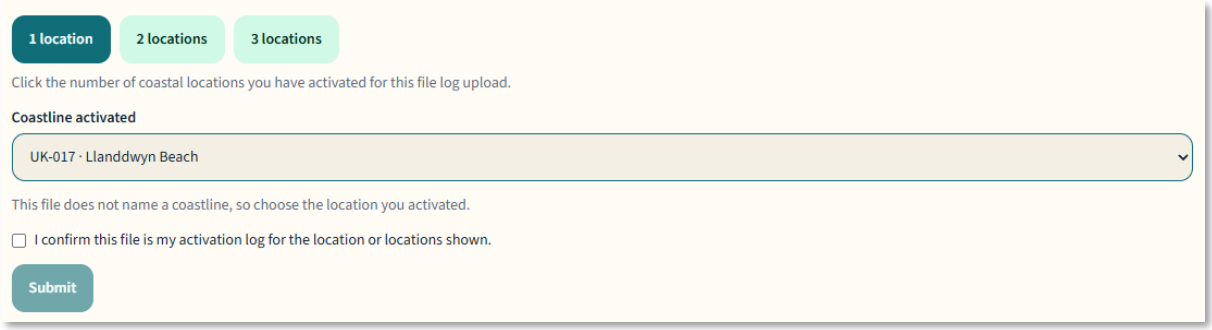

5. Click the **Upload activation log** button and choose the file.

6. Check the summary. It shows the **file name**, the **number of contacts**, the **date**, and the station **callsign**. If the callsign does not match your account, the file will not be accepted. E.g.,

7. Press **1 location**, **2 locations** or **3 locations**. Use **1 location** for a single place. Use **2 locations** for a 2-fer, or **3 locations** for a 3-fer, when you were inside every location at the same time. The same contacts are then credited to each one.

8. Under **Coastline activated**, choose the location (click the arrow). For a 2-fer or 3-fer, also complete **Second location** and, if needed, **Third location**. Each menu must be a different location.
9. Tick **I confirm this file is my activation log for the location or locations shown.**
10. Press **Submit**.
11. Read the message under the form. An accepted upload is also listed under **Uploaded logs**, on the **Logs** tab, with the reference and the number of contacts added.
